Google Cloud Platform

Google Cloud Platform: Essentials

Vishal Padghan (Great Learning)

Offerings Of This Live Session

01   **Why Cloud Computing?**

02   **Cloud Service Providers**

03   **What Is GCP?**

04   **GCP infrastructure**

Google Cloud Platform

Why Cloud Computing?
Before Cloud Computing

Start a Business

Setup Infrastructure

Manpower for Management

Before Cloud Computing

Challenges

Invest Heavily for Setup

Invest in Resources

Scalability

Less Time to Focus on Business

How Cloud Computing Helps?

Cloud Computing is Analogous to Electricity Supply

You Pay What You Use

Somebody Else Manages the Services

Cloud Service Providers

Popular Cloud Service Providers

What Is GCP?

What Is GCP?

GCP is a Cloud Service Provider that enables on-demand services like compute, storage, networking, etc which can be accessed through the internet and the user is not required to manage these resources

Features

Cost Effective

Security

Pay As You Go

Availability and Disaster Recovery

Scalable

Flexible
